

SYSTEM AND METHOD FOR PROVIDING AN  
INFORMATION NETWORK ON THE INTERNET

ABSTRACT OF THE DISCLOSURE

- 5                   A system and method for providing an information network on the Internet is provided. The system includes a plurality of websites and at least one redirect assigned to each website. The websites each include a category, information about the category and a domain name that corresponds to the category. The redirect includes a URL redirect that directs a browser or a server to the assigned website. The
- 10   method includes the steps of: (1) providing a plurality of websites; (2) providing each website with a category, information about the category, and a domain name that corresponds to the category; (3) providing at least one redirect assigned to each website; and (4) providing each redirect with a URL redirect that directs at least one of a browser and a server to the assigned website.
